are made in sections or units. These units are of solid and not collapsible construction, which makes it possible to remove a unit with contents intact, and without risk of collapse.

The fronts are selected White Oak or Mahogany, and the ends solid Oak or real Mahogany. They are not veneered. The backs and bottoms are three-ply, which offsets any tendency to warp, split or swell.

The interlocking Strip is an inconspicuous device intended to secure a more perfect alignment when two or more tiers are placed side by side.

AMUSEMENT NOTES.

Bert La Mont's musical ensemble "Boys and Girls," was presented at the opera house last evening, and the audience present was one of the smallest of the season. The musical comedy was hardly up to the standard already set by other companies playing here the present season, but several features of the piece combined to make it acceptable to the audience. Jonathan Keefe, as "David Thureston," the Broadway rube, created much mirth and interpreted to the satisfaction of everyone a role which is usually overdrawn. George F. Allen as "Solitaire," in the scene showing the cowboy camp, gave several imitations of barnyard denizens, and demonstrated unusual ability in mimicry. The six girl students at Blair academy featured in dancing and singing acts that added life to the piece. "The Lady and the Prince" will be presented to-night by the same company.

J. C. Farwell of Amsden, whose big barn was burned recently and himself was terribly burned trying to save his horses, is slowly improving. One horse refused to go out and perished. The flesh on one of Mr. Farwell's hands is coming off, the other is not as bad. The barn was about 150 feet long and contained 80 tons of hay and all his farm machinery.

GOOD VALUES

It is not our policy to quote you the lowest possible price on Flour without regard to quality.

It is our policy to make the lowest price possible on the highest grade of Flour. All of our Flour is bought by the car direct from the mills. The housewife making a few loaves at a time does not notice that there are from 25 to 50 loaves per barrel difference between a low and high-grade of Flour.

All of our Flours are tested in our bakery and we know which will give the best results. We use several barrels per day and know that the higher grade Flour, at a higher price, is the best and most economical.
